

TECHNICAL SEO PROGRESS REPORT

Website: LinkableAsset.com

Prepared by: AROWOJEBE SHERIFFDEEN A. (Jebson)

Role: SEO Intern, Verge Digital

Reporting Period: 27th, July 2026.

Executive Summary

A technical SEO review and optimization were conducted on LinkableAsset.com to improve crawlability, indexing, and overall search performance. Following the optimizations, the website continues to gain visibility in Google Search.

Google Search Console recorded **894 impressions**, an increase from **524 impressions** in the previous reporting period (approximately **71% growth**). Although the website is yet to record organic clicks (0% CTR), the increase in impressions indicates that Google is crawling, indexing, and displaying the website more frequently in search results.

Work Completed

The following technical SEO tasks were completed:

- Reviewed Google Search Console indexing reports.
 - Inspected and validated affected URLs using the URL Inspection Tool.
 - Tested live URLs and submitted important pages for re-indexing.
 - Verified redirect implementation across HTTP and HTTPS versions.
 - Confirmed proper canonical tag configuration.
 - Resolved previous indexing concerns.
-

Current Indexing Status

The website currently has **no critical indexing errors**.

The only remaining reports in Google Search Console are expected technical behaviors:

- **Page with Redirect:** HTTP versions correctly redirect to the preferred HTTPS version.
- **Alternate Page with Proper Canonical Tag:** Google correctly recognizes the preferred canonical URL and excludes duplicate versions.

No further action is required for either report.

Performance Overview

Google Search Console

- **Impressions:** 894 (Previously 524)
- **Clicks:** 0
- **CTR:** 0%

Lighthouse Audit

Mobile

- Performance: **88**
- Accessibility: **93**
- Best Practices: **100**
- SEO: **100**

Desktop

- Performance: **78**
- Accessibility: **89**
- Best Practices: **100**
- SEO: **100**

Core Web Vitals remain stable on both mobile and desktop, with fast loading times and excellent visual stability.

Key Observations

The website is technically healthy, with no major crawl or indexing issues remaining. Redirects and canonical tags are functioning correctly, while SEO and Best Practices achieved perfect Lighthouse scores across both mobile and desktop.

The continued increase in impressions suggests that Google's confidence in the website is improving. However, the absence of clicks indicates that the next stage of optimization should focus on improving search result appeal rather than technical SEO.

Next Recommendations

The next phase of SEO should prioritize:

- Improving page titles and meta descriptions to increase CTR.
 - Publishing more high-quality, search-intent-driven content.
 - Strengthening internal linking between relevant pages.
 - Building quality backlinks to improve authority and rankings.
 - Monitoring Google Search Console for changes in impressions, CTR, and keyword positions.
-

Conclusion

LinkableAsset.com has achieved a solid technical SEO foundation. The website is properly crawlable and indexable, with no outstanding technical issues requiring immediate attention. The increase in search impressions demonstrates positive SEO momentum. Going forward, efforts should focus on improving click-through rate and content authority to convert growing search visibility into sustained organic traffic.
