Performance Update

Since taking over the SEO task for Pinnacle Behavioral Healthcare, I have been closely monitoring the website's performance through Google Search Console while carrying out on-page and technical SEO improvements.

When I started, the website recorded:

- **Total Clicks:** 1.37K
- **Impressions:** 93.2K
- **CTR:** 1.5%
- **Average Position:** 16.3

The latest performance figures are:

- **Total Clicks:** 1.38K
- **Impressions:** 98.6K
- **CTR:** 1.4%
- **Average Position:** 23.7

The website has gained **5.4K additional impressions**, increasing from 93.2K to 98.6K, while total clicks have also increased slightly from 1.37K to 1.38K. This indicates that the website is receiving more visibility in Google Search.

The CTR has remained close to the previous figure, moving from 1.5% to 1.4%. The average position has also changed from 16.3 to 23.7, which shows that improving keyword rankings and turning the increased visibility into more clicks remain key areas of focus.

I will continue monitoring the website's performance and working on the on-page and technical SEO areas that can help strengthen its rankings, visibility, and organic traffic.
